

The Battle of the Neighbourhoods - Week 2

Data point: New York City.

We will be using the below datasets for analysing New York city

Data 1: New York City is split up into five boroughs, which are the Bronx, Brooklyn, Manhattan, Queens, and Staten Island. In order to segment the neighbourhoods and explore them, we will essentially need a dataset that contains the 5 boroughs and the neighbourhoods that exist in each borough as well as the latitude and longitude coordinates of each neighbourhood.

This dataset exists for free on the web. Link to the dataset is : <https://www.latlong.net/place/new-york-city-ny-usa-1848.html>
